

UPGRADE YOUR OLD SA2.0 TO 2020 PRO SERIES TECHNOLOGY.

Sound Reduction Kit

SonicAire's Sound Reduction Kits (SRK) are designed to upgrade legacy SonicAire fans to the sound and improved cleaning power of SonicAire's 2020 PRO Series fan designs. The SRK comes fully assembled with all attachment hardware for ease of installation.

The SRK virtually eliminates tonal sound issues in legacy fans and reduces fan noise levels by 3dBA at 20'.

SPECIFICATIONS

- Available at 230, 380, 460, and 575 volts
- 2 HP motors measure 79 dBA at 20' (6 meters)
- 1 HP motors measure 78 dBA at 20' (6 meters)
- Parts Kits warranted for 1 year in applications up to 130°F / 55°C for Standard Motor, up to 170°F / 75°C for High Temperature Motor.

3 Phase Gear Motor Replacement Kit

Gear Motor Replacement Kits (GMK) include a robust PRO Series 3 phase gear motor. In addition to a maximum ambient temperature rating of 293°F (145°C), the 1/56th horsepower, totally enclosed fan-cooled motor is equipped with long-life planetary gearing, synthetic lubricating oil, and high temperature oil seals. The gear motor sits inside the fan yoke to further protect both the gear motor and cooling rotor from the temperature and humidity of the plant environment.

SPECIFICATIONS

- Available at 230, 380, 460, and 575 volt configurations
- High temperature synthetic lubricating oil and seals
- Gear motor Temperature rating of 293°F/145°C
- Cast aluminum and steel construction
- CE and UL certified component

*Now extended to
June 30, 2020!*
